10/12	THUR	29-Apr-10	30-Jul-10	20-Aug-10	21-Oct-10	18-Nov-10

Notes

1. To promulgate changes to aeronautical information via AIPNZ and NOTAM, your details must be current in the AIM register of authorised originators. See www.nzais.co.nz for further information on originators and submission guidelines.

2. The indicated cut-off date is the final date for receiving submissions. Originators do not need to wait for the cut-off before submitting changes to AIM. It is desirable to submit planned changes well before the cut-off date as soon as they are available, particularly when the changes are numerous or complex in nature, including the development of AIP charts and SUP graphics.

3. Effective dates are fixed by AIRAC. Other dates may be subject to change. See www.nzais.co.nz for latest cut-off dates.

4. Promulgation of permanent changes via **SUP**, **AMDT**, **ENRC** and **VNC** is subject to available capacity in a given update cycle: NOTAM will be issued as required to ensure information is promulgated in a timely manner.

5. If **SUP** material is associated with an **AMDT**, **ENRC** or **VNC** update, the cut-off for the SUP material will be same as the associated **AMDT**, **ENRC** or **VNC** cut-off.

6. If **AMDT** material is associated with an **ENRC** or **VNC** update, the cut-off for the AMDT material will be same as the associated **ENRC** or **VNC** cut-off.

7. Promulgation of information that does **not** qualify for AIPNZ or NOTAM is by *Aeronautical Information Circular (AIC)*. AIC cut-offs are generally the same as SUP cut-offs. Contact AIM technical editors at aimedit@airways.co.nz for more info on promulgating AIC.

8. Duration of regular Update Cycle between Cut-off date and AIRAC Effective date -
 SUP: 65 days AMDT: 90 days ENRC: 128 days VNC: 202 days

9. Update cycle **10/2** for **SUP** and **AMDT** has been extended by 2 weeks (14 days) to accommodate Print Contractor availability over the Christmas/New Year period. Dates have not otherwise been adjusted for public holidays.

10. Update cycle **10/1** for **SUP** has been advance by 2 weeks (14 days) to accommodate the extension of update cycle 10/2. Update cycle 10/1 has not been extended in duration.
